

Wake Up ***EVERY*** Morning Feeling

***EXHAUSTED?***

**How To Reverse Your  
Energy Crisis  
in Six Simple Steps!**

READ ON for the often-undiagnosed health problem that leaves you feeling exhausted (even after a good night's sleep)...  
fuzzy-headed... forgetful... sick... and moody...

...And discover the natural solution that restores your get-up-and-go – so you can handle whatever life throws at you.

Dear Tired Friend,

If you drag through your day feeling like a zombie...

...fight daily battles with brain fog...

...have trouble remembering appointments and special dates...

...catch every sickness that invades your home or office...

...feel easily overwhelmed by life's problems...

...and barely have the energy at night to work the remote...

**Your Body is Sending Out  
URGENT Warning Signals  
that Something is Wrong**

There's BIG trouble in your adrenal glands.

These hardworking, walnut-sized glands produce life-balancing hormones that...

**Maintain healthy blood pressure** by regulating the amounts of sodium and potassium in your body...

**Control your metabolism** – so you can avoid unwanted weight gain...

**Balance your blood sugar levels** by supporting glucose utilization...

**Fuel your sex drive** with healthy levels of testosterone and other sex hormones...

And **help your immune system fight off illness**.

Your adrenal glands are so vital for your health...

## Your SURVIVAL literally DEPENDS on Them!

Your adrenal glands don't just keep your body in balance. They are also your primary survival mechanism – your body's own "fight-or-flight" mechanism, if you will.

The moment you perceive danger, your adrenal glands pump out adrenaline and cortisol to boost your blood sugar and blood pressure. Immediately, your breathing quickens... your heart rate increases... your thinking becomes razor sharp... and your muscles are fueled for action.

Whether you need to swerve to avoid the car that just cut you off... race to intercept your grandchild before he runs into a busy street... or keep your dog from being bit by the neighborhood mongrel, you react with lightning-fast reflexes that allow you to save yourself – or someone you love.

Then, when the crisis is over, insulin swoops in to mop up the excess blood sugar... your heart and breathing calm... and all systems return to normal.

At least, that's the way it's supposed to work. The problem is...

## Non-Stop STRESS Has Pushed Your "Fight-or-Flight" Mechanism into OVERDRIVE

Historically, the immediate dangers our ancestors faced were infrequent and didn't last long. They'd occasionally have to outrun a hungry tiger or fight off an attacking bear, but then things would return to a dull normal.

They didn't have impatient bosses with impossible deadlines... children failing Algebra...

Lee Euler has written about natural health options for more than 20 years. His books and articles have been read by millions. He is the Executive Director of the prestigious Alternative Cancer Research Institute, editor and publisher of two popular newsletters, Cancer Defeated and Natural Health Insiders, and the author of numerous books and reports including *The Missing Ingredient for Good Health*, *Don't Touch My Prostate*, *The Oxygen Miracle*, and *Breast Cancer Cover-Up*. He has also contributed to publications of many top doctors including Julian Whitaker, David Williams and William Campbell Douglass, Health Science Institute, and others.

Recently, Mr. Euler has embarked on what he calls "one of the most exciting projects of my life" – bringing little-known or newly discovered healing herbs and plant extracts to the public through a supplement company called **Green Valley Natural Solutions**.

unexpected bills arriving in the mail... and other modern-day stressors like you do.

Yes, things have changed – dramatically. In your 21st century life, you're bombarded by stress triggers on a daily basis. Just when you've managed to scrape up enough money to replace a leaking roof... your car's transmission dies. You finally get your aging mother nursed back to health after a bout of the shingles... and your father ends up in the hospital with a heart condition.

It never seems to end! The problem is... your body interprets each crisis as "danger." So, your adrenal gland is continually pumping out stress hormones.

This creates a constant flow of cortisol that...

Raises your blood pressure and insulin levels...

Increases your cravings for sugary, fatty foods...

Makes you pile on the pounds...

And sends your energy levels plummeting.

Eventually...

## Your Adrenals Can No Longer Keep Up With the Unending Demand – and They Wear Out

These glands were made to handle brief emergencies – not one long emergency that never ends.

In Western countries, we've come to accept non-stop stress as an unavoidable part of our daily lives. Few of us realize the damage it does to our adrenal glands. But, think about it...

Your favorite running shoes... your car tires... and even your washing machine all wear out with continued use. So, why would your adrenal glands be any different? After years of constantly being told to produce cortisol and adrenaline, they become exhausted... depleted... and eventually quit working the way they should.

Unfortunately, this is not an isolated problem. Experts say **eight out of every ten** Americans silently suffer from poor adrenal gland function. In fact, this adrenal "burn-out" is the hidden reason why you...

**Feel exhausted all the time** – even after a good night's sleep and a steady supply of caffeinated beverages...

**Can't lose weight**, no matter how much you diet and exercise...

**Keep striking out in the bedroom** – and have little to no sex drive...

**Struggle to think clearly and remember things**...

**Get sick more often** than you used to...

**Battle digestive problems**, including occasional cramping, diarrhea, and constipation...

**Feel moody, anxious, and irritable** most of the time...

And **can't get control of your blood pressure and blood sugar**.

It feels like your health – which used to be good -- is slipping away.

## **You Become Desperate to Regain Your Energy... Balanced Moods... and a Sharp, Clear Mind – But Your Doctor is NO Help!**

If your adrenal glands are on the fritz, you have a problem.

You see, many doctors don't recognize adrenal gland problems as the source of your symptoms. And, even if they do run tests to check your adrenal function, the results are usually inaccurate.

The good news is... the right combination of nutrients can protect, nourish, and recharge your adrenal glands – and restore your energy... clear thinking... and fantastic moods.

There's only one problem... you're not getting these nutrients in your daily diet in the amounts required to renew your tired adrenal glands.

So, my team at Green Valley Natural Solutions got busy finding a solution that helps you...

## **Nourish and Protect Your Overworked Adrenals – So You Can Have Energy and Mental Clarity to Face Life's Many Challenges**

**Adrenal Charge™** provides the essential nutrients that are missing from your diet and from ordinary vitamin supplements – so you can revitalize and protect your hardworking adrenal glands.

As you will see in a moment, **Adrenal Charge™** works its adrenal-renewing, energy-boosting magic without ANY stimulants of any kind – not even caffeine. All you get are substances straight from Mother Nature that help you...

Wake up every morning, feeling refreshed, rested, and ready to face your day...

Drive away brain fog – ushering in a sharper, clearer mind...

Walk the dog... play a round of tennis or golf... or put in a full-

day at the office – and still have energy to spare when you get home...

And sleep more deeply than you have in years!

You know that energized, rejuvenated feeling you get after returning from a long, relaxing vacation on the beach? It's something like that, only...

## **Adrenal Charge™** **Gives You that Calm, Well-Rested, Raring-to-Go Feeling Each and Every Day!**

**Adrenal Charge™** is formulated with a precise combination of scientifically-researched nutrients to make it easy for you to give your adrenal glands the support they need against the harmful effects of stress.

According to studies, these amazing, all-natural adrenal-boosters help neutralize stress and bring your body back into balance in **SIX powerful ways...**

### **#1) Keep Your Mind Calm and Clear – No Matter What Life Throws at You**

You get a letter in the mail from the IRS, and what happens? Your heart begins to pound... you breathe faster... and your hands may even shake a little as you open the envelope.

In other words, you panic. But, let's rewind a bit. What if you could face life's unexpected curveballs with a sense of calm – and, dare I say, peace?

It's totally possible – with the help of an ancient root called **ashwagandha**. In the Indian language of Hindi, the name of the plant literally means “strong as a horse” – and it certainly lives up to that description! It's been used for centuries in Ayurvedic, Indian, and African medicine to boost stamina and relieve stress.

Ashwagandha is known as an adaptogen. It possesses amazing brain-calming, body-balancing, and immune-boosting abilities to help your body “adapt” to or neutralize stress, anxiety, and fatigue. I guess you can say, with ashwagandha...

**You can rein in your stress  
response – and quickly restore a  
tranquil balance**

Researchers have found that ashwagandha helps bring

#### **More than Just a Stress-Reliever... Ashwagandha can SAVE Your Memory!**

Researchers at the National Brain Research Centre in India gave ashwagandha to mice with the most dreaded type of memory loss (you know the one I mean). Within just 20 to 30 days, the mice improved greatly in various cognition tests – and their levels of beta amyloid plaque were dramatically reduced (particularly in the cortex and hippocampus where learning and memory take place.)<sup>16</sup>

your wayward stress response back into balance by improving your cortisol levels. And that one change makes a huge difference in the way you feel. Take a look at these study results:

In a study reported in *Life Extension Magazine*, patients taking ashwagandha root *lowered their cortisol levels by 26%* – despite being put under stress. They even experienced increased energy, improved sleep, and an enhanced sense of well-being!<sup>1</sup>

Indian researchers gave chronically stressed-out subjects ashwagandha root extract for 60 days. Not only were levels of cortisol *significantly reduced*, but the patients reported handling stress better... improved moods... and a better quality of life.<sup>2</sup>

A study published in the *Journal of the American Nutraceutical Association* found that ashwagandha promoted a decrease in cortisol levels, blood pressure, and pulse rate – and boosted the DHEA hormones that create critical “sex” hormones. What’s more, subjects felt more energetic and slept better... experienced fewer headaches and muscle aches... improved their memory and focus... and enjoyed lighter moods.<sup>3</sup>

With ashwagandha’s balancing act in your body...

**Your mind is sharper...  
your moods are improved...  
and it’s easier to manage your  
weight!**

The best part is... ashwagandha isn’t just a cortisol-reducer. It also supports healthy, optimally-functioning adrenal glands by...

**Boosting a Sluggish Thyroid** – Your adrenal glands support healthy thyroid function. So, if your adrenals are out of whack, there’s a good chance your thyroid is, too. A powerful thyroid-balancer, ashwagandha was shown to improve thyroid function in laboratory mice – which helps boost metabolism (for easier weight management) and relieve fatigue.<sup>4</sup>

**Balancing Your Moods** – In the journal *Phytomedicine*, researchers reported that ashwagandha calmed anxiety and battled depression<sup>5</sup> – without the negative side effects of drugs!

**Banishing Brain Fog and Memory Loss** –

Ashwagandha has been shown to help clear those memory-stealing plaques out of the brain – and can be a powerful tool against devastating memory loss. Its stress-busting, memory-boosting abilities make it a star ingredient in **Adrenal Charge™**.

[Click here](#) to get this powerful formula now – and pay nothing today except Shipping & Handling.

### **John F. Kennedy's HUGE Health Secret**

At just 43 years old, John F. Kennedy was the youngest man ever elected President of the United States. During his 1960 campaign, he appeared to be full of youthful energy and vitality. He even told voters he was “the healthiest candidate for President in the country.” But it was all a lie.

JFK had been experiencing (and hiding) a number of health problems that affected his ability to function, including extremely low blood pressure... chronic back problems... and serious digestive troubles. However, one health condition was so closely guarded that even the pathologists that performed his autopsy were sworn to secrecy...

**His adrenal glands were so burned out – there was barely anything left of them.** This sentenced him to a lifetime of fatigue, decreased appetite, low blood pressure, and a reliance on daily hormone shots in order to survive.

You don’t have to suffer with low energy... foggy thinking... memory troubles... and

Ashwagandha has been shown in studies to slow, stop, and even reverse the loss of brain cells – and boost neurotransmissions within the brain.<sup>6</sup> This amazing brain-boosting ability helps keep your memory sharp – and makes it easier for you to concentrate and learn new things.

constant sickness like JFK did. [Get Adrenal Charge™](#) to protect and restore your adrenal glands – and pay nothing today except Shipping & Handling.

So, you can see how ashwagandha helps you face any crisis with a clear, calm mind and nerves of steel. This one thing will make a world of difference in your quality of life, but **Adrenal Charge™** doesn't stop there...

## #2) Protect Your Delicate Brain Cells from the DEADLY Effects of Stress

Stress, deadly?

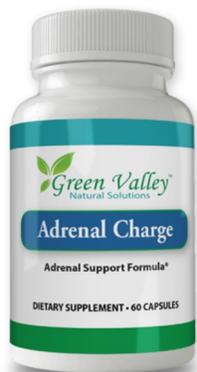

Unfortunately, it can be. It speeds up the aging process and increases your risk of several diseases and conditions – including heart disease... low bone density... and suppressed immune function. And just wait till you see what it does to your brain cells...

### PS Improved Cognitive Function Under Stress

In a study published in the journal *Nutritional Neuroscience*, German researchers gave participants either PS (phosphatidyl serine) or a placebo and assigned them cognitive tasks to complete after subjecting them to induced stress. The volunteers who took PS performed better and were in a much more relaxed state than the placebo group.<sup>17</sup>

That's why we've included PS in **Adrenal Charge™** – to help you keep a clearer, sharper mind no matter what situation you may face.

[Click here to get it now](#) – and pay nothing today except Shipping & Handling.

In studies published in *Molecular Psychiatry* and the *Journal of Neuroscience*, researchers found that cortisol released as a result of chronic stress damages – and even kills – cells in your hippocampus, which is the area of your brain responsible for memory and learning. At the same time, excessive cortisol also hinders the growth of new neurons in that part of your brain.

This causes your hippocampus to shrink... wreaks havoc with your memory and ability to learn... and increases your risk of developing more serious mental health issues.<sup>7,8</sup>

That's why each bottle of **Adrenal Charge™** contains *phosphatidylserine* or **PS**.

PS is a phospholipid found in your cell membranes, and, frankly, your cells cannot be healthy without it. This amazing cell-protector gives your cells shape and stability. Plus, it controls what particles are allowed in – or kept out.

This is so important for your brain, because...

## Healthy cell membranes make healthy brain cells

Over 3,000 published research papers and more than 60 clinical trials have found that PS improves both your brain health and stress response by...

Protecting and rejuvenating your brain cell membranes...

Boosting your levels of feel-good hormones dopamine and serotonin...

Stimulating the growth of NEW neurons...

Dialing back your stress response, so you stay calmer and cooler under pressure<sup>9</sup>...

Reducing levels of brain-damaging cortisol<sup>10</sup>...

And restoring your body's 24-hour circadian rhythms, for better sleep and regeneration.

For you, that means improved memory... razor-sharp focus and concentration... enhanced ability to learn new things... lighter, more balanced moods... and a calmer response to the stress that creeps into your life.

## #3) Regulate Adrenal Hormone Production to Prevent Burnout and Boost Your Energy Levels

When you're under massive amounts of continual stress, your adrenal glands just can't keep up – and they start to fall down on the job.

That doesn't only affect your stress response. This adrenal "breakdown" also sends your blood pressure soaring (which doesn't do your heart health any good)... kills off your sex drive... and makes it next to impossible to lose weight. That's because these two little glands produce the hormones essential to your heart, metabolism, and sexual response.

You need to support the healthy production of hormones in your adrenal glands – so you can look, feel, and perform at your best. That's why **licorice root** is included in every capsule of **Adrenal Charge™**.

### Licorice root: your secret weapon for coping with mental and emotional stress

This sweet herb has been found to have cortisone-like properties that closely match your body's own natural hormone composition. This resemblance allows licorice root to help regulate the production of hormones in your adrenal gland – including the stress hormone cortisol.

#### "High Energy All Day!"

"I am a 43-year-old very busy father of three and hard-charging entrepreneur. Between being a good dad, a good husband, doing some exercise and building my business, I frequently run out of steam by the end of the day. A friend of mine recommended **Adrenal Charge™**, and I gave it a try, and was amazed: Quite simply, I had a good burn of high energy all day and well into the evening. Not manic, like having too much coffee, but it just felt like good, stable energy. It made me feel younger, there was no 3 p.m. fatigue, and I was in a great mood all day. This supplement makes sense and really works."

--Dan, Connecticut

In other words, the licorice in **Adrenal Charge™** helps relieve the load on your adrenals. It floods your body with hormones that help head off burnout... revive your sex life... supercharge your energy levels... and even make you look and feel younger.

Nothing will be too difficult for you to handle – not even your crazy schedule, crabby boss, or a surprise visit by your in-laws!

## #4) Replenish Your Critical “Energy-Boosting” Vitamins that are Depleted by Chronic Stress

### More than a Stress Hormone-Producer...

Your adrenal glands are responsible for producing other hormones you need for good health, including...

**Aldosterone** – This hormone helps control your blood pressure and balance your sodium and potassium levels.

**Dehydroepiandrosterone (DHEA)** – This hormone is used by your body to make androgen and estrogen – male and female sex hormones.

Do you know that daily stress depletes your body’s supply of essential B vitamins?

I guess you can call it a “catch-22.” You need **vitamins B5** and **B6** to help produce your adrenal hormones and manage your stress response – but the stress they’re supposed to *help* actually ends up *hurting* them!

Now, this is a bigger problem than doctors think. Take vitamin B6, for example. A large-scale study conducted at Tufts University found that B6 levels were surprisingly low for certain groups of people – including women of reproductive age, male smokers, non-Hispanic African American men, and people over the age of 65.<sup>11</sup>

I’d be willing to bet our stress levels have a lot to do with it!

**Adrenal Charge™** helps replenish the vitamins B5 and B6 that stress has stolen away – so you can get control over your stress response... produce those essential adrenal hormones... and recover your energy and peace of mind.

## #5) Ensure a Healthy Stress Response – Even on Your Most Challenging Days

You may think of **vitamin C** as your “go-to” supplement for helping to fight off a cold. But, researchers have found that this powerful antioxidant is also one of your most essential anti-stress nutrients.

They discovered that your adrenal glands contain MORE vitamin C than any other organ in your body.<sup>12</sup> Your adrenals use it to produce the cortisol and the other hormones you need for a proper stress response.

The problem is... each time you’re under stress, you burn through your supply of vitamin C as quickly as an SUV guzzles gas on a road trip. Ironically, when your levels of vitamin C become too low, your adrenal glands panic and release too much cortisol. And you already know the effect high cortisol levels have on your blood pressure, blood sugar, and body weight.

That's why experts now believe...

## Taking vitamin C is one of the BEST ways to manage your stress levels

Studies have found that vitamin C reduces both mental and physical symptoms of stress – while helping you bounce back from stressful situations quickly. For example...

German researchers gave study participants either vitamin C or a placebo and subjected them to a public speaking task combined with math problems. Both cortisol levels and blood pressure were significantly lower for people taking the vitamin C – and they reported feeling much less stressed out by the task.<sup>13</sup>

In a study published in *Science Daily*, researchers fed vitamin C to lab rats that were placed under stressful conditions. They found that the vitamin C significantly decreased the levels of stress hormones in the blood. Plus, it reduced other indicators of physical and emotional stress – such as enlargement of the adrenal gland and loss of body weight.<sup>14</sup>

Plus, vitamin C helps support a healthy stress response by...

**Stimulating your immune system to fight off sickness** – which helps reduce the stress load on your adrenal glands.

**Boosting your energy during stressful times** – When University of Wisconsin researchers gave vitamin C to obese adults on calorie-restricted diets, both heart rate and perceived exertion while exercising were dramatically decreased – as were their feelings of fatigue<sup>15</sup>

**Protecting your adrenals from free radical damage** – so they can function in top form.

Unfortunately, your body is not able to manufacture vitamin C on its own, so your supply will run out quickly when you're under a lot of stress. **Adrenal Charge™** replenishes the vitamin C your adrenal glands use up – so you have plenty on hand to deal with the next stressful situation life throws at you.

## #6) Support the Growth and Development of Healthy New Adrenal Cells

You've spent decades trying to rush the kids out the door on time to catch the bus... fighting traffic to get to work... dealing with unreasonable bosses (and maybe even unexpected layoffs)... struggling with unforeseen (and expensive) health issues... working through relationship problems... and navigating financial tight spots.

### Vitamin C Helps Reduce Fatigue

In a University of Wisconsin study, obese volunteers who took 500 mg of vitamin C daily experienced decreased heart rate and less exertion and fatigue than the group taking the placebo.<sup>18</sup>

Researchers agree that vitamin C is an essential weapon in your stress-management arsenal – and you get it in each serving of **Adrenal Charge™**.

[Click here](#) to get the stress relief you need now – and pay nothing today except Shipping & Handling.

With the nearly non-stop stress, your adrenal glands have been worn to a frazzle – and you can't seem to shake off how exhausted you feel.

It's time to send in the cavalry...

...**Natural adrenal concentrates.**

The raw, natural concentrates of porcine adrenal glands you get in **Adrenal Charge™** are loaded with the RNA and DNA you need to...

## Recharge your adrenal glands and reboot the production of essential hormones for restored energy and vitality

According to medical research, nucleic acids RNA and DNA play major roles in protein synthesis, cellular renewal, and healthy cell division. As cellular “building blocks,” they help grow new adrenal cells and strengthen existing ones by basically “recharging” them.

In other words, they revive and fortify your adrenal glands – so you can face any situation with strength, energy, and a sense of calmness.

Now, here is what makes the adrenal concentrates in **Adrenal Charge™** special...

### The Effects of Long-Term Stress on Your Brain

Mild, short-term stress can actually improve your brain function. It certainly does help you think more clearly in a crisis. However, chronic stress can harm your brain by...

Reducing circulation and depriving your brain cells of the oxygen and nutrients they need to survive and thrive.

Inhibiting the delivery of glucose (needed for energy) to your brain...

Disconnecting vital nerve pathways...

And hindering the formation of new brain cells.

### “Energy Continues to Improve!”

“I had a lack of energy and have been looking for ways to get more. Thanks to **Adrenal Charge™**, I experienced a gain in my energy within a few days. Even better, my energy continued to improve as I continued to take your product. Thanks!”

--Casey S., Texas

### “I’ve tried others, but this is the BEST!”

“I’m 73 and I felt like I needed more energy, but I didn’t want to take a product that would just pump me up. Once I realized that my adrenals needed to be nourished, I tried **Adrenal Charge™**. I’ve taken other adrenal nutrition in the past and **Adrenal Charge™** is the best. I began to feel more energy and had a more positive outlook in less than three weeks!”

--Vera M., Missouri

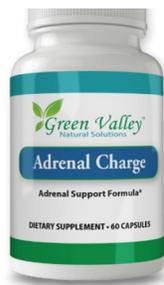

Porcine DNA is 98% the same as human DNA, which makes our adrenal concentrate extremely compatible with the cells in your adrenal glands. Most other supplement makers use either bovine extracts – which are only 80% compatible with human DNA – or synthetic concentrates that actually suppress your adrenal glands, instead of helping them.

What’s more, the hormones from the glandular extracts in **Adrenal Charge™** are removed before the extract is freeze-dried to preserve enzyme activity. That gives you the fatty acids, vitamins, amino acids, minerals, neurotransmitters, and a boatload of other nutrients you need to boost your adrenal health – without ANY risk of a hormone overdose.

## Adrenal Charge™ Gives You

The good news is... **Adrenal Charge™** helps you manage your stress response and supports healthy cognitive function.

[Click here to get it now](#) – and pay nothing today except Shipping & Handling.

## EVERYTHING You Need to Revitalize Your Adrenal Glands and Unleash Boundless Energy!

When doctors first started diagnosing (mostly severe) adrenal gland problems in the 1960s, the only real option

for treatment was hormone shots – which came with a boatload of undesirable side effects and did NOTHING to protect or improve the health of the adrenals.

That's why I'm so incredibly grateful for the medical breakthroughs I've just shared with you. They've made it possible for Green Valley Natural Solutions to offer you a natural, adrenal-boosting formula that works powerfully to protect your adrenal glands and support optimal function – even when you're under extreme stress.

For you that means...

You can bound out of bed every morning feeling refreshed, invigorated and ready to face your day...

You're able to deal with life's unexpected stresses – like the dog peeing on the carpet right before company is expected to arrive – with steady calm (and maybe even a sense of humor)...

You can watch the numbers go down on the scale – and get tons of compliments about how great you look...

You will remember life's important details better – like your anniversary – and learn new things much more easily...

You've got the energy to run your errands... catch up with the gardening... and still have energy for bowling with friends in the evening...

You can enjoy a revival of your sex drive and higher satisfaction in the bedroom...

You'll surprise your doctor with improved blood pressure and blood sugar numbers...

You'll bask in lighter, happier moods all day long...

And feel more energetic, youthful, and alive than you have in a long time!

But, the best news is...

## You Can Try It

### Before You Pour Another Cup of Coffee – STOP!

When you feel exhausted, it's only natural to turn to coffee, energy drinks, or herbal stimulants to help you get through the day. However, these "stimulants" may be doing you more harm than good. For example...

The artificial energy boost they give you doesn't last – and only leaves you feeling worse when you finally "crash."

Taking stimulants regularly (even natural ones) places additional stress on your already over-burdened adrenal glands – and may even damage them.

### New Obesity study confirms...

#### Chronic Stress Can Make You FAT!

Starting in 2002, researchers at University College London studied the cortisol levels in the hair of more than 2,500 men and women every two years. The results? The MORE cortisol found in the subjects' hair, the MORE

**BEFORE You Buy It!**

**Just pay Shipping & Handling  
today And you can try  
Adrenal Charge™ For a FULL  
30 Days... on Us!**

likely they were to be obese or carry excess belly fat.<sup>19</sup>

Don't let excessive, stress-induced cortisol levels wreak havoc with your weight loss efforts. Take advantage of this [special offer](#) and get control of your stress hormones with the help of **Adrenal Charge™**.

Dragging yourself through life – too exhausted to fully appreciate even the special moments – is no way to live.

People across this country have already used **Adrenal Charge™** to neutralize the harmful effects of stress... supercharge their energy... and give them the support they need to calmly face whatever each day may bring.

And, now it's your turn.

I'm so confident that **Adrenal Charge™** will transform your life that I want to offer you a one-of-a-kind deal...

[Try it for a full 30 days risk-free](#) – and pay for it later! That's right... we'll send you a 60-day supply of **Adrenal Charge™** (a retail value of \$79.90), and all you pay today is \$9.95 Shipping & Handling.

I want you to use **Adrenal Charge™** for 30 whole days. If you don't feel more rested in the mornings... energetic throughout your day... and relaxed even during your most stressful moments, just call or email us – and send back the unused portion.

That's all you have to do. You won't have to pay another cent. Your credit card will only be charged if you decide to keep the two bottles of **Adrenal Charge™**.

There's absolutely no risk, so why wait another moment?

## Energy-Zapping Stress Isn't Going Away... Isn't It Time You Took Control?

In these modern times, life comes at you fast.

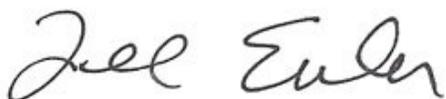

You think for just a few moments that everything is going fine. Then, your son wrecks the car... your spouse is laid off... and the water heater goes kaput. And with each and every "crisis," your adrenal glands are pummeled... your energy is stolen... and your health goes downhill.

But now you've discovered it doesn't have to be that way.

With **Adrenal Charge™**, you can protect and revitalize your adrenal glands and reduce the effects of daily stress on your overall health.

[Click here](#) to go straight to the secure checkout page and claim your risk-free trial of **Adrenal Charge™**. [Take action now](#) to get the adrenal-boosting nutrients you need to face each crisis calmly... send your energy soaring... and simply get more enjoyment out of your life.

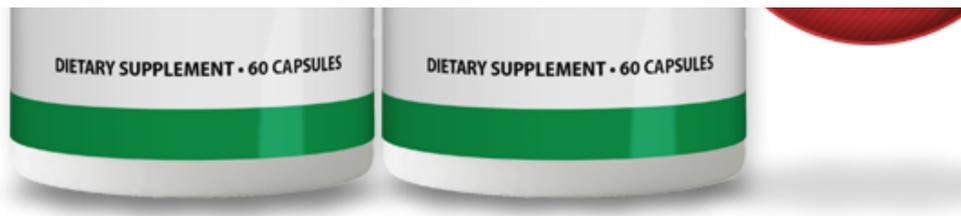

Here's to your improved energy and health,

Lee Euler  
President, Green Valley Natural Solutions

**P.S.** Remember, you have a full 30 days to try **Adrenal Charge™** before you pay a dime (other than Shipping & Handling), so don't hesitate. [Click here to buy it now](#), and wake up each day with the energy you need to take on the world.
