

MAJOR ANNOUNCEMENT

TINY BIOTECH'S PAIN-KILLING MICROSPHERES COULD RECEIVE FDA APPROVAL ANY DAY NOW...

Igniting a potential 58,213% revenue explosion!

**And today you can lock in a ground-floor opportunity
of the biggest blockbuster in a decade!**

Hi, it's Ernie Tremblay.

I'm so excited.

At any moment, I expect the FDA to give the green light to the miraculous Microspheres I showed you in my presentation today.

That could mean 31 million Americans suffering from the devastating pain of osteoarthritis will finally get their lives back!

This is going to be a welcome kick in the gut to Big Pharma who have utterly failed these people.

They've been pushing dangerous steroid injections... and worse, deadly opioids... onto ailing osteoarthritis patients for years.

But no more...

These Microspheres are the advanced osteoarthritis treatment everyone has been waiting for.

They are 100% OPIOID-FREE – with NO major side effects.

And trial results have been spectacular – ending pain 95% of the time.

With repeat use, the pain does not have to return. EVER!

All of which means as soon as the FDA approval goes through...

**The tiny company that developed these Microspheres could go from being a
nearly unknown biotech firm to one of the largest on the planet.**

Its Microspheres will instantly become the go-to treatment for osteoarthritis patients everywhere.

We're talking about an enormous \$185 billion market – all potentially migrating to one tiny little firm.

Remember, this company's sales are only \$6.3 million right now.

So, even if it captures a mere 2% of the market, its sales would explode to \$3.7 billion.

That's a 58,213% revenue surge.

This is exactly how blockbuster drugs make early investors millionaires.

It starts with a small, unknown company developing a revolutionary breakthrough that's safer and more effective than anything else on the market...

Then, as soon as the FDA approval news gets out...

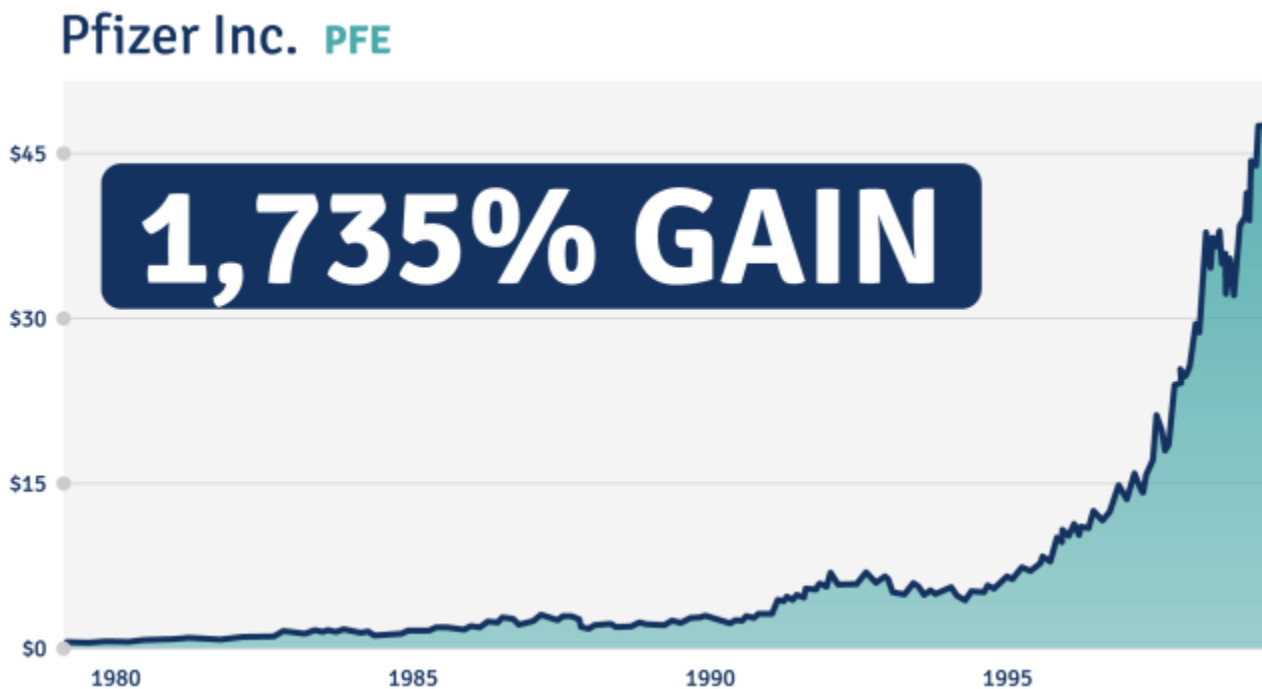

The company's stock price shoots through the roof, making early investors boatloads of cash.

Take Pfizer, the maker of the biggest blockbuster of them all – cholesterol drug Lipitor.

Today, Pfizer is a household name. A mega-pharmaceutical firm with \$53.4 billion in revenue.

But before Lipitor came along, it was just a tiny company trading for around \$1 a share.

Then it shot up like a rocket – to \$46 – a **1,735% gain**.

As an early investor, a modest \$5,000 stake in Pfizer would have made you **\$91,750 richer**.

Celgene is another example, with their myeloma blockbuster drug Revlimid.

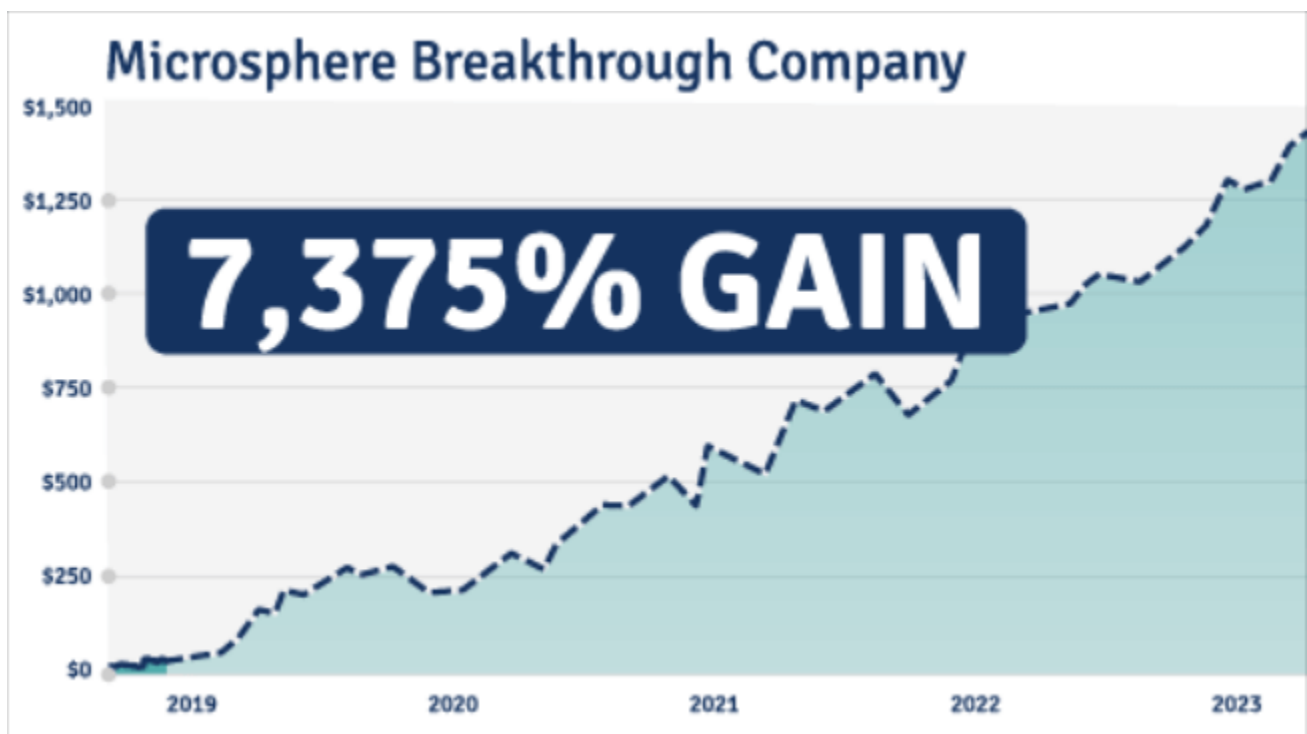

Had you been an early investor in Celgene, you could have gotten in at \$4.34 a share and cashed out at \$131.25.

That's a **2,924% gain**...

Enough to turn \$5,000 into **\$151,200**.

But this Microsphere treatment could be the biggest blockbuster of them all.

Let me repeat: Just capturing a measly 2% of the market share for osteoarthritis gives them a revenue surge of 58,213%.

Enough to turn a small stake into \$1,494,800.

But you only have a very brief window of time to discover how to lock in a ground-floor opportunity of its Microsphere breakthrough.

All the details will be found in my ***Microsphere Breakthrough Dossier*** I'm releasing today.

It gives you everything you need to know about this tiny company... its incredible executive team... and their miraculous treatment.

For example, you'll learn...

- Behind-the-scenes details of the clinical trials – revealing the impressive results and giving you **a sneak peek at ongoing studies...** full details on the company's priceless patents for their Microsphere technology – and how these patents snuff out every competitor in the marketplace for over a decade...
- The detailed launch plans designed to get these amazing Microspheres into **every hospital and doctor's office in the country...**
- And the strategies this tiny company is using to expand the pain-relieving Microsphere treatment to hips, shoulders, and more – **so they can eventually "own" the entire \$185 billion osteoarthritis market.**

Plus, I give you my revenue projections over the next 12 to 18 months and beyond – so you can see how high the stock price can go.

Let me be clear: This is a very rare biotech breakthrough... a blockbuster drug that can capture a huge market... and a millionaire-making opportunity.

Based on our projections right now, we believe ground-floor investors in this company could become very wealthy millionaires.

Even if they just capture a mere 2% of the market, and experience a 58,213% revenue surge as we expect...

You could turn a modest stake into \$1,494,800.

Why do you think the insiders who run this company are quietly loading up?

- The CEO recently snapped up shares worth more than \$790,000...
- The CSO picked up shares of more than \$270,000...
- And the new CFO acquired shares worth \$813,000.

Major institutional players like BlackRock have also gobbled up more than \$53 million worth of this company's shares in anticipation of the FDA's imminent decision.

Regular investors still have time to act before the big announcement...

But time is running short. An FDA decision could come at a moment's notice.

People who hesitate could miss out on some life-changing money.

There is another reason you will want to act quickly.

Due to the small size of this Microsphere company, I can only release a limited amount of copies of my Dossier.

Only 500 Microsphere Breakthrough Dossiers will be available today, first come, first served.

They will be sent to members of my ***Biotech Insider Alert***.

Accept this no-risk invitation and you will immediately get ***The Microsphere Breakthrough Dossier*** with complete details on this tiny company and my exact buy recommendation on it right now.

But that's just the beginning. As a member of ***Biotech Insider Alert***, you'll also receive:

- ✓ **Immediate Action Alerts – on every potential double-you- money biotech company I learn about**
Every time I come across a breakthrough opportunity – and my extensive three-phase process confirms that the timing is right – I'll issue an immediate "buy" alert, via email. It will give you all the details – including recommended buy prices, where I see the stock moving both in the short and longer term, and when to sell.
- ✓ **Weekly Updates**
You'll never be left wondering what's up with any stock I'm recommending. Every day, I'm in touch with doctors, company officials, my personal FDA contacts, and other experts. And I'll keep you in the loop – so you know everything relevant to the company's success.
- ✓ **Immediate Text Alerts**
Because these little drug stocks can move quickly – both in the run-up phase and on their catalyst dates – it is imperative you get in as close to my recommendation as possible. That's why, if you so choose, you can sign up to receive mobile alerts on your cell phone, alerting you to check your email for my latest recommendation – wherever you may be.
- ✓ **"Live" Portfolio Tracking**
Anytime you want to check the price of the stocks in the ***Biotech Insider Alert*** portfolio, simply log on and you'll see real-time prices for all the picks. That way, you always know where you stand with every single recommendation.
- ✓ **Members-Only Web Access**
The instant you join, you'll get your members-only password access to ***Biotech Insider Alert's*** exclusive

site. There, you'll find my most recent recommendations, all past alerts, every single update, and a link to the "live" portfolio track record.

And there's something else I want to give you today, a special Bonus Gift to thank you for subscribing to **Biotech Insider Alert...**

The Biotech Insider Alert Fast-Start Guide. This is where you'll find out how to maximize your membership. I've spelled out everything you need to know to get started, such as...

- How my "Secret Calendar" pinpoints exactly when a stock is poised for a breakout so explosive it could hand you triple-digit gains...
- The "Five Catalysts" and why they have the unique ability to send a stock soaring...
- How my "Three-Phase Formula" (25 years in the making) accurately determines whether a new drug will be a blockbuster winner – or a casualty of the FDA-approval process...
- The three kinds of drugs that (almost always) crash...
- What to expect from my simple, step-by-step alerts, and how they can help you buy pharmaceutical stocks for pennies on the dollar...
- And the FDA's "Hidden Code" – an invaluable piece of intelligence that could help you secure "millionaire status" in record time.

And this is just the beginning...

Hundreds of new compounds are making their way from laboratory to marketplace. I'm watching them like a hawk – putting them through my "Three-Step Formula" to find the potential winners. And every time I come across a breaking situation, you'll be the first to know.

So, get ready, because that could mean an additional five to 10 new recommendations in the next three months alone.

You'll have the chance to capitalize on historic biotech windfalls.

In the past, these kinds of paydays have reached:

| | |
|---------------------|---------|
| Seattle Genetics | 2,623% |
| Illumina | 3,679% |
| United Therapeutics | 3,983% |
| Medivation | 5,744% |
| Regeneron Pharma | 7,650% |
| Alexion Pharma | 13,033% |
| Jazz Pharma | 34,800% |

Normally, the price for **Biotech Insider Alert** is \$5,000 a year. And I believe our members will tell you that it's an absolute bargain.

"I made close to \$30k profit... Thank you VERY much – You are the best advisor and expert!" – Terrence Yardley (Portland, Maine)

"I am up \$10K in a little over one month. Soon we will have a very nice retirement after suffering huge losses at the hands of Fidelity." – Andrew Rogers (Cupertino, California)

"I am up \$39,200 on one trade...and \$46,700 on another. Feeling good!! Thanks Ernie." – Bennie Blackstone (Napa, California)

"I made \$3,600 in just a few days. Easily covered my subscription in one trade!" – Josh Packer (St. Cloud, Florida)

"\$4,800 profit so far! Very good service Ernie!" – Miles Deering (Austin, Texas)

"I couldn't believe my eyes when I opened my account this morning. I got \$8,300 profit in just 3 weeks!" – Paul Peterson (Stanton, California)

But today I've authorized an immediate 61% discount!

I want to prove to you how valuable my research can be. So I'm making a full year of **Biotech Insider Alert** available for just \$1,950 – that's more than **\$3,000 OFF** the regular price.

What's more, I'll give you...

**My Biotech Insider Alert
"200% Winners... 10X" Guarantee**

Follow my recommendations in my **Biotech Insider Alert**. If you haven't collected at least a 200% windfall at least 10 times over the next year, just let us know. You'll get a full refund of your money.

Even more, I'll also give you an entire full year of **Biotech Insider Alert** on the house.

That's right, I'll work for you for free!

That's how sure I am of my Three-Step Formula's ability to pinpoint winners – and give you plenty of opportunities to build your wealth. This tiny company's pain-relieving Microspheres – which have the potential of triggering a massive windfall for you – is just one of them.

So please take action now. I'm only accepting 500 new members today, so this opportunity may close at any time.

Feel free to use the 100% secure order form below. Or, if you prefer, call our special concierge representatives at 855.509.6600 or 443.353.4770. They are available from 8 a.m. to 5 p.m. Monday through Friday, EST.

But please... don't wait another minute.

To your success,

A handwritten signature in black ink that reads "E. Tremblay". The signature is written in a cursive, flowing style with a large, prominent initial "E".
